ELECTRICAL JATC
OF SOUTHERN NEVADA

Southern Nevada Operating Engineers JATC

What is an Operating Engineer?

Click the logo below for more information:

Operating Engineers are highly trained, skilled professionals who...

- Operate heavy construction equipment on high-rise buildings, roads and freeways, residential developments, dams, waterways, airports, and underground tunnels; or
- Do specialized work operating cranes, concrete, pumpers, pile drivers, or drilling equipment; or
- Perform inspections and testing during construction phase on such things as reinforced concrete, soils, structural masonry, prestressed concrete, structural steel, and welding; or
- Repair and maintain heavy duty construction equipment, working in shops or on job sites where equipment has broken down; or
- Work in plants that produce sand, gravel, asphalt, and concrete; or
- Work on or near the water with dredging equipment; or
- Survey and check the slopes and grade of the Earth

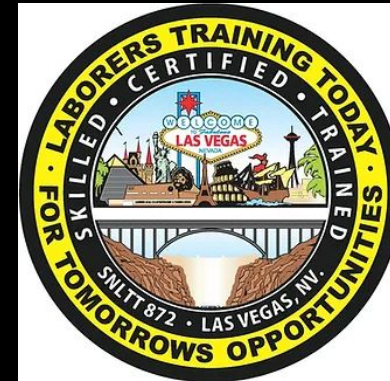

Southern Nevada Laborers Union

WHAT IS A LABORER?

In construction, Laborers are often the first craft worker to arrive on a project and the last to leave. Duties performed involve heavy highway (asphalt placement), traffic control, building construction, (site preparation, concrete placement, material stocking, cleanup), scaffold building, demolition, environmental remediation, underground utilities and tunnel and shaft construction. Using tools such as shovels, picks, rakes, brooms, wheelbarrows, gas, or diesel powered compacting equipment & buggies. Working conditions will vary according to the weather and the type of work performed at heights, in trenches, or sometimes underground.
